Subject: FYI - press inquiry FW: Rad scans of Hunters Point buildings - background information
Attachments: Excerpts from EPA written comments to the Navy regarding buildings.docx

Dear Angeles,

John asked me to let you know that we will share already-public documents requested by a reporter Chris Roberts. One file (attached) has excerpts from two sets of EPA's written recommendations sent to the Navy, signed by Enrique and John, respectively. The other documents were written and circulated to other agencies by the Navy and CDPH. Brianna has confirmed these are all public documents and appropriate to release.

- Lily

Trying to file something by late this week or early next week about the Navy's findings from sampling trench units at Parcels C and B. Lily would know about that. This may be related, but wanted to see what is a practicable turnaround time. Happy to work with you on this.

Hi Michele and Lily –

Chris Roberts here, working on a story concerning HPNS for Curbed SF.

I was going through some emails obtained in a documents request and found mention of some documents, copies of which were not included in the file I received.

In an email with the subject line "Rad scans of Hunters Point buildings - background information," sent June 22, Lily makes reference to the following documents:

"1 - Excerpts from written comments EPA sent 12/16 and 1/17 regarding buildings

2 - CDPH memo about building scans in Parcels C & E (dated 11/16)

3 - Navy's summary of exceedances of ROD RG's found in rescans of Buildings 271 and 406 (dated 10/16)

4 - Rescans already done in some survey units in some buildings - Executive Summary from Rad RACR Addendum (dated 4/16)"

Will you please provide copies of these documents?

Thanks,

C

Thank you for the earlier discussion about buildings. For your convenience, I am attaching the following information for background about the issue:

- 1 – Excerpts from written comments EPA sent 12/16 and 1/17 regarding buildings
- 2 – CDPH memo about building scans in Parcels C & E (dated 11/16)
- 3 – Navy's summary of exceedances of ROD RG's found in rescans of Buildings 271 and 406 (dated 10/16)
- 4 – Rescans already done in some survey units in some buildings – Executive Summary from Rad RACR Addendum (dated 4/16)
